

## Skills

### Ruby on Rails

I love how user friendly and intuitive ruby and rails are, the language is very close to English and even if you don't know something you can make a good educated guess as to how it works. When working on a project I was able to easily integrate APIs such as DeepL Translation API and Google Vision in tandem with the Kimurai gem. The rails "convention over configuration" allows for development productivity to be quicker than average and this makes for faster delivery times and easier debugging when deployed. I have used Heroku for deployment many times .

### HTML and CSS/SCSS

I have used both of these languages in everything I've done so far. Using bootstrap and websites like Font Awesome are powerful ways to create front end fast, however, I personally like to try my own CSS to consistently improve on my design skills.

### JavaScript

Using JavaScript is always challenging as it's such a flexible language and can be used for so much. Every time I have used JS in the past I've always discovered something new. I really like how JS6 has smooth interoperability for modules like Node.js and how it allows for less misunderstandings than JS5 did.

### Teamwork

I have worked remotely in teams using Github and Git. When I worked on development projects, using SCRUM and Github became second nature and quick delegation along with coding in silo allowed our team to work productively and efficiently. I thrive off of teamwork and consider it a comfortable environment.

### Other skills

SQL	Figma	Stimulus
AJAX	ASP.NET	React
Trello	C#	UX
API's	Docker	UI

## Languages

English - Native

Japanese - Conversational

## Fullstack Web Developer

I'm a Fullstack developer with a background in education. I create, code, and improve the server, server-side applications, and databases that, when combined with beautiful front-end code, helps create a functional, seamless experience for the end-user.

## Education

### Le Wagon Bootcamp - Web Development

Graduated March 2022 - Built a fully functioning web application to find your ideal skincare product in Japan. Project URL <https://www.carearound.life>

### Bachelor of Arts: Radio And Television Broadcasting

Graduated 2013 from the University of The West of Scotland - Ayr, Scotland

## Employment History

### Fullstack Developer

2022 - Mamoru

Volunteer my development services for backend and frontend maintenance. Work is fully remote with a multinational team.

### Backend Consultant

2022 - Concept Consulting Ltd

Consulted on existing web applications written in Python and designed in Django.

Advised and implemented solutions remotely via GitHub.

### ESL Teacher

2020 / 2022 - Altia Central

Developed activities and integrated technology to diversify instruction.

Educated students in basics of English grammar and conversational speaking.

### Head Teacher

2016 / 2020 - Interac North

Onboarded new employees with training and new hire documentation.

Managed team of 15 teachers spread throughout large area
